### Bugs Word Scramble

Look at each picture of a bug and unscramble the letters and write the name of the bug on the line provided.

 _____	ebe _____	 _____	aglubdy _____
 _____	lebeta _____	 _____	disper _____
 _____	tan _____	 _____	turf ebtly _____
 _____	morw _____	 _____	lyf _____

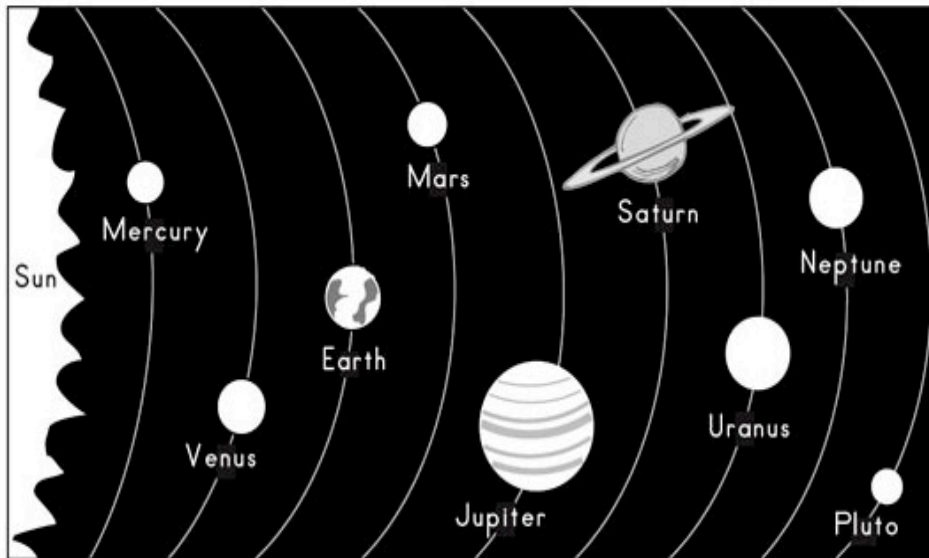

# Planets

Identifying the planets and ordinal numbers

## Planet Positions

Follow the directions below to help C.J. and Edison learn about the planets.

Color the sixth planet from the sun.

Color the second planet from the sun.

Color the third planet from the sun.

and

Color the fourth planet from the sun.

Color the first planet from the sun.

Color the ninth planet from the sun.

Color the fifth planet from the sun.

Color the seventh planet from the sun.

Color the eighth planet from the sun.

*C.J. Says:*

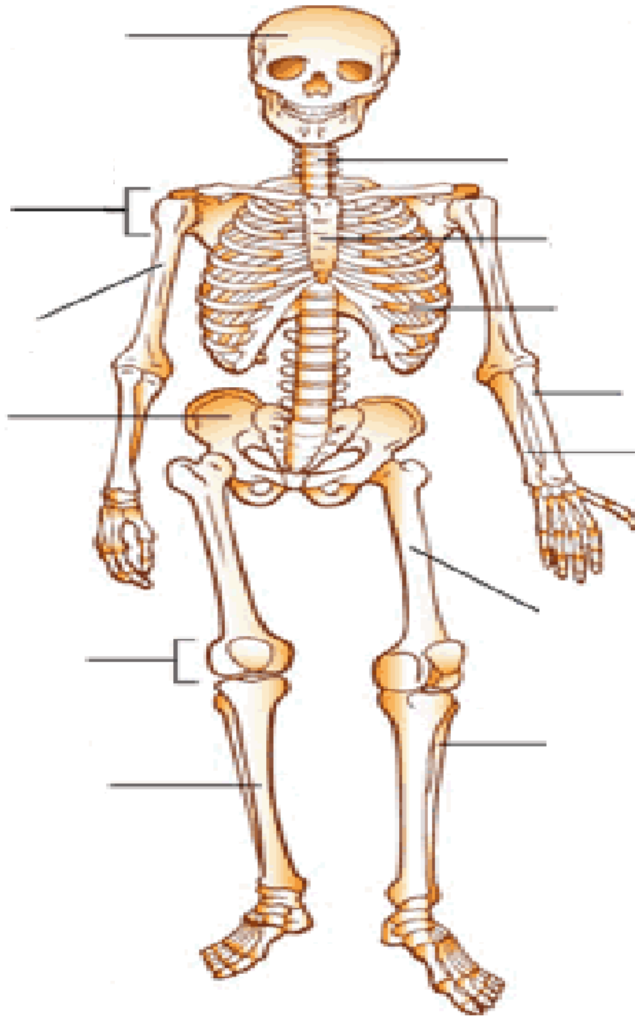

Talk with your child about the planets in our solar system. Go to the library and get books to help you in your discussions. Point out each planet's proximity to the sun and their proximity to one another. If you have a planetarium near your home, take advantage of a visit to this exciting place.

## Planet Earth Vocabulary Quiz

**Directions:** Match the vocabulary words on the left with the definitions on the right.

- |                     |  |
|---------------------|--|
| 1. ozone            | Any area of land with specific natural features.   |
| 2. atmosphere       | the center part of the Earth.  |
| 3. equator          | A specific area of the earth that falls between the core and the crust.                          |
| 4. rotation         | The specific gas that surrounds the earth.   |
| 5. mantle           | The outer layer of the earth's surface.  |
| 6. drought (drouth) | to treat (waste products) for reuse or so as to recover reusable materials.                      |
| 7. core             | Large areas of salt water that surround much of the earth's surface.                             |
| 8. revolution       | A type of oxygen that is produced by electricity and is in the air, mostly after a thunderstorm. |
| 9. recycle          | The made up line around the earth that shows how far the North and South poles are.              |
| 10. erosion         | The central like the earth revolves around.  |
