

Name:

Course:

1. Write the word that corresponds to each definition:

- Instrument used to observe and study the universe:
- Name of the system where planet Earth is located:
- Gigantic ball of very hot gas that produces a lot of energy:
- Group of stars. In the universe there are hundreds of billions:

2. Identify to which element of the Earth the following images correspond:

.....

.....

.....

.....

3. Look at the diagram and write the number corresponding to each part of the Earth. Then define them in one sentence.

Equator:

.....

Earth's axis:

.....

Hemisphere:

.....

4. Write the season corresponding to each image. Then, using arrows, match each season with its start date.

.....

.....

21 June

21 March

21 December

21 September

.....

.....

Name:

Course:

1. Visit the following website dedicated to the Solar System and mark the correct statements about the planets and other celestial bodies:

<http://www.tiching.com/683530>

- A meteorite is a star that has fallen out of the sky.
- Mars' two satellites are called Deimos and Phobos.
- An asteroid is a large rock in outer space.
- The planets Jupiter, Saturn, Uranus and Neptune have rings.
- Mercury's orbit takes 58.5 days.
