

## Iniciamos la Sustracción

\*¿Cuántos quedan en cada caso? Sigue el ejemplo.

|                                                                                                           |                                                                                                            |
|-----------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------|
| <br>$5 - 2 = \square$    | <br>$6 - 3 = \square$    |
| <br>$8 - 5 = \square$   | <br>$10 - 8 = \square$  |
| <br>$5 - 4 = \square$  | <br>$4 - 2 = \square$  |
| <br>$10 - 6 = \square$ | <br>$9 - 3 = \square$  |
| <br>$18 - 9 = \square$ | <br>$12 - 7 = \square$ |

# Sustracción de números del 0 al 9

\* Resuelve las siguientes sustracciones:

$$\begin{array}{r} 5 \\ - 2 \\ \hline \square \end{array}$$

$$\begin{array}{r} 6 \\ - 2 \\ \hline \square \end{array}$$

$$\begin{array}{r} 3 \\ - 1 \\ \hline \square \end{array}$$

$$\begin{array}{r} 4 \\ - 0 \\ \hline \square \end{array}$$

$$\begin{array}{r} 2 \\ - 1 \\ \hline \square \end{array}$$

$$\begin{array}{r} 6 \\ - 3 \\ \hline \square \end{array}$$

# Sustracciones verticales

\* Completa y resuelve las sustracciones en forma vertical.

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |

# Repasamos adiciones

\* Resuelve las siguientes adiciones:

$4 + 3 = \underline{\quad}$

$2 + 2 = \underline{\quad}$

$4 + 3 = \underline{\quad}$

$2 + 3 = \underline{\quad}$

$1 + 4 = \underline{\quad}$

$0 + 9 = \underline{\quad}$

$1 + 5 = \underline{\quad}$

$4 + 0 = \underline{\quad}$

$2 + 8 = \underline{\quad}$

$0 + 4 = \underline{\quad}$

$2 + 1 = \underline{\quad}$

$1 + 7 = \underline{\quad}$

$6 + 2 = \underline{\quad}$

$3 + 3 = \underline{\quad}$

$7 + 0 = \underline{\quad}$

$0 + 3 = \underline{\quad}$

$1 + 3 = \underline{\quad}$

$0 + 3 = \underline{\quad}$

$1 + 1 = \underline{\quad}$

$4 + 2 = \underline{\quad}$

$1 + 6 = \underline{\quad}$

# Sumas verticales

\* Cuenta los dibujos y escribe el número en cada cuadradito.  
Luego realiza las operaciones de adición correspondientes.

|                                                                                                                                                                                                                                                                                                                                                        |                                                                                                                                                                                                                                                                                                                                                             |
