Ejercicios de Operaciones Combinadas

Resuelve las siguientes operaciones combinadas.

a) $50 + 40 - 30$

$\begin{array}{c} \diagdown \quad \diagup \\ \square \end{array} - \begin{array}{c} \downarrow \\ \square \end{array} = \square$

b) $80 + 20 - 30$

$\begin{array}{c} \diagdown \quad \diagup \\ \square \end{array} - \begin{array}{c} \downarrow \\ \square \end{array} = \square$

c) $38 + 4 - 9$

$\begin{array}{c} \diagdown \quad \diagup \\ \square \end{array} - \begin{array}{c} \downarrow \\ \square \end{array} = \square$

d) $85 + 10 - 5$

$\begin{array}{c} \diagdown \quad \diagup \\ \square \end{array} - \begin{array}{c} \downarrow \\ \square \end{array} = \square$

e) $99 - 9 + 10$

$\begin{array}{c} \diagdown \quad \diagup \\ \square \end{array} + \begin{array}{c} \downarrow \\ \square \end{array} = \square$

f) $36 + 43 + 10$

$\begin{array}{c} \diagdown \quad \diagup \\ \square \end{array} + \begin{array}{c} \downarrow \\ \square \end{array} = \square$

g) $65 + 5 - 50$

$\begin{array}{c} \diagdown \quad \diagup \\ \square \end{array} + \begin{array}{c} \downarrow \\ \square \end{array} = \square$

h) $35 + 35 - 30$

$\begin{array}{c} \diagdown \quad \diagup \\ \square \end{array} + \begin{array}{c} \downarrow \\ \square \end{array} = \square$

Seguimos trabajando

* Resuelve las siguientes operaciones combinadas

a) $15 - 5 + 45$

$$\begin{array}{c} \vee \qquad \downarrow \\ \underline{\quad} \bigcirc \underline{\quad} = \underline{\quad} \end{array}$$

b) $85 + 5 - 5$

$$\begin{array}{c} \vee \qquad \downarrow \\ \underline{\quad} \bigcirc \underline{\quad} = \underline{\quad} \end{array}$$

b) $26 + 4 - 5$

$$\begin{array}{c} \vee \qquad \downarrow \\ \underline{\quad} \bigcirc \underline{\quad} = \underline{\quad} \end{array}$$

d) $99 - 29 + 18$

$$\begin{array}{c} \vee \qquad \downarrow \\ \underline{\quad} \bigcirc \underline{\quad} = \underline{\quad} \end{array}$$

e) $60 + 15 - 10$

$$\begin{array}{c} \vee \qquad \downarrow \\ \underline{\quad} \bigcirc \underline{\quad} = \underline{\quad} \end{array}$$

f) $50 + 25 - 5$

$$\begin{array}{c} \vee \qquad \downarrow \\ \underline{\quad} \bigcirc \underline{\quad} = \underline{\quad} \end{array}$$

g) $89 - 9 + 20$

$$\begin{array}{c} \vee \qquad \downarrow \\ \underline{\quad} \bigcirc \underline{\quad} = \underline{\quad} \end{array}$$

h) $30 + 60 - 50$

$$\begin{array}{c} \vee \qquad \downarrow \\ \underline{\quad} \bigcirc \underline{\quad} = \underline{\quad} \end{array}$$
